

TOUGH ENOUGH TO TREAD ON TOES OF STEEL

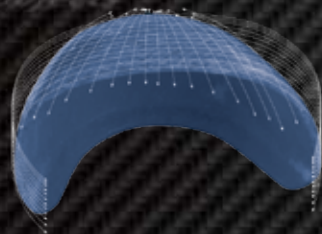

Introducing **REBEL S1 SAFETY FOOTWEAR** - boasting a state-of-the-art composite toecap that beats steel six ways from Sunday, with no compromise on comfort and support. Rebel's vast safety footwear range - including standard styles, non-metallic, ladies' styles, security boots, heat resistant product and outdoor product - boasts an industry-best return rate of 0.02%, with all footwear compliant with relevant safety regulations and only the finest quality materials used. Check 'em out today. And see why with Rebel, the world really is at your feet.*

- Composite inner sole to prevent penetration by sharp objects
- Hard outer sole for good wear characteristics
- Soft mid sole
- EVA inner sole
- Padded tongue for greater comfort
- Tibrelle lining to wick moisture away.
- State-of-the-art non-metallic composite toecap

State-of-the-art non-metallic composite toecap:

- Lighter than steel
- Recovers its shape after impact, so feet can be removed easily
- Won't set off metal detectors
- Can be read by x-ray machines to avoid concealment of stolen goods
- Unlike steel, doesn't attract radiation and extreme temperatures
- Wider toecap fit for greater comfort

*Rebel is also the sole importer of Puma safety footwear.
